Project Title: Michael Jordan Website

I'd like to build this site as multiple pages. Typical site navigation will be across the top. For Michael Jordan, I think there will be plenty of content and photography to build out individual pages.

- Home Page/Introduction: I want to introduce Michael Jordan's life and legacy
- Career: I want to introduce a history of his most notable games
- Philanthropy and Business: I want to take a look at his Jordan's collection along with his purchase of the Hornets
- Legacy: Awards and honors that he has received
- Sources
